PUC
89%
- **ACHARYA INSTITUTE OF TECHNOLOGY** 2022
B.E
7.64

Skills

- C
- C++
- Solid edge
- CAD
- CNC
- Python

Projects

- **Regenerative braking system along with ABS in hybrid vehicles**
Automobile.
11/21-- Current
In this project we are trying to integrate both RBS & ABS to improve the safety and make automotives efficient
- **Automated pneumatic grinding machine**
Mechanical.
5/21-- 8/21
In this project we learnt about pneumatics, grinding process, working and fabrication of this machine.

Experience

- **Hindustan Aeronautics limited** 20/09/2021 - 20/10/202
Intern
I Worked as intern in Line Replacement Lab of MRO(Maintenance Repair & Overhauling) Division, Helicopter division, HAL. Where i was closely exposed to the industrial working.
This internship helped me to gather information about the working, hydraulics, assembly, transmission & overhauling of the helicopter. This also was great hands on experience which I would cherish for my life time
