Projects:

Title: News Feeder

Descriptions:

Technologies used:

- Front End: HTML, CSS, JavaScript, JQuery
- Back End: PHP, MYSQL
- Framework: Bootstrap
- Server: Apache

The main purpose of the project is intended to develop a portal for management of Web based news. The news feeder provides a suitable and easy display for which users around the world can learn or will have the knowledge about the world. No formal knowledge is needed to use this portal. There are three modules of this website Admin, Author and Users. Every module has its own purpose. The Admin who has all authority of this website, Author who writes the articles or any stories on this website but they do not have full access and last one users who can read the articles on the website, comment on any articles.
