## Academic Project:

### **Title: Detection of Fake Online Reviews**

#### **Aim:**

My project was about detection of fake online reviews using semi-supervised and supervised learning. Using this project, I detected the fake online reviews from unauthorized users in online shopping websites.

In this project ,I used front end as JAVA and backend as MYSQL and some technologies like HTML, CSS, JAVASCRIPT etc.

#### **Result:**

I secured good grading in my academics through this project
