PROJECTS

#Project1:

Project Title : A responsive E-commerce Website.

Languages Used : HTML, CSS.

Description : An E-commerce Website For Shoes project is a web application which is developed in HTML CSS platform. It is a user-friendly website design instantly makes it easy for customers to find what they need. To speed up the shopping experience, visitors can use the on-site search engine to look for their desired items, also helping to show the most relevant product.

#Project2:

Project Title : ATM Transaction System .

Environment: Java and Python.

Description : This project is about the creation of an ATM program for representing ATM transaction. In this ATM program, the user has to select an option from the options displayed on the screen. The options are related to enter the password, withdraw the money, deposit the money, check the balance and exit from the transaction.

#Project3:

Project Title : IOT Based Smart Irrigation System.

Tools Used : Arduino IDE, Proteus.

Description : An automated irrigation system refers to the operation of the system with no or just a minimum of manual intervention beside the surveillance. Almost every system (drip, sprinkler, surface) can be automated with help of timers, sensors or computers or mechanical appliances. It makes the irrigation process more efficient and workers can concentrate on other important farming tasks.

STRENGTHS

- ❖ Flexibility and Consistency.
- ❖ Problem-solving and decision-making.
- ❖ Good communication skills.
- ❖ Confident and positive attitude.
