## CAREER OBJECTIVE

I am looking for a challenging position in the IT sector where I can utilize my skills and the opportunity to upgrade my knowledge about the new and emerging trends in the sector.

## EDUCATION

### Bachelor Of Engineering in Mechanical - 2019

Savitribai Phule Pune University

(69.79)

### HSC-2014

MBC, Latur (65.38)

### SSC-2012

Jawahar Navodaya Vidyalaya, Latur (77.50%)

## PROJRCT

**Mini Project** - Aerodynamics in car modification.

The objective of project is to overcome the aerodynamic drag force which act on vehicle by using aerodynamic devices. It helps to direct the flow of air through the walls of the car making it less prone to drag force. In today's life, there is more need of aerodynamic based cars to decrease consumption of fuel.

**Final Project** - Analysis and synthesis in multifunctional structural super capacitor.

The project was totally based on research area, multifunctional structural supercapacitor carries mechanical loads while storing electrical energy, this advantage leads to construct supercapacitor who having more energy density capacity and withstand high mechanical loads as well as, by using different parameters like carbon fibre, electrolyte, and separator.

## TECHNICAL SKILLS

**Languages:** Core Java, Basic C programming, SQL

**Database:** Oracle

**Frontend Technologies:** Html, CSS, JavaScript, jQuery.

**Framework:** Hibernate, Spring.

## CERTIFICATION

Currently pursuing a certification course in Java Full Stack Developer from SEED InfoTech, Pune.

## INTREST

Cricket

Listening light music

Travelling

## LANGUAGES

English

Hindi

Marathi
