Major Project:

TEXTUAL RATING PREDICTION USING SENTIMENT ANALYSIS

The main objective of the proposed project is to speculate an almost accurate review of a product available over the internet going by the reviews written about the product, with the help of Data Mining. In this work, we propose a sentiment-based rating prediction method to improve prediction accuracy in recommendation systems.

In our paper, we not only mine social user's sentiment, but also explore interpersonal sentiment influence and item's reputation. Finally, we take all of them into the recommender system.

Internship Project:

Online examination System

Today Online Examination System has become a fast growing examination method because of its speed and accuracy. It is also needed less manpower to execute the examination. Almost all organizations now-a-days, are conducting their objective exams by online examination system, it saves student's time in examinations. According to today's requirement, online examination project in php is very useful to learn it. In this project my major role is developing the web pages and administration execution. I am using simply html and xmp sever.
